AIR RESISTANCE

AIR + AIRPLUS RESISTANCE

ECON Console

The easy-to-read console is designed for simplicity and the ability to view every important metric at all times in 1 simple display

The display shows :

Time Rowed, Time/500M, Watts, Pulse (when con-nected to a heart rate monitor), Meters/Distance, Strokes Per Minute, Calories, and Total Strokes. You can also cycle through 9 different performance measurements in the middle window. Total Time, Avg 500m Pace, Avg Meters per Stroke, Max HR, Calories per Hour, Force Curve, Max Watts, Avg Watts, and Watts for each of the previous 15 pulls

SMART CONNECT

HIIT Console

A large, color-coded, and Smart Connect enabled LCD display with a progress circle so you can quickly identify your workout progress. Watch the progress circle move in a clockwise direction and change colors as you head towards the finish line.

The display shows :

All Important data with the addition of air resistance and airplus resistance levels. The console uses different colors to display the intensity of your workout (heart rate), the watts you're generating, and your progress in the workout with the progress circle. Further, this Smart Connect compatible console allows you to connect to numerous apps in our Smart Connect Eco-system by bluetooth and ant+.

ECON Console
The easy-to-read console is designed for simplicity and the ability to know your progress at all times.

The display shows :
Air Damper Resistance Level, Time, Distance, Calories, RPM, Watts, Speed, Pulse at all times, along with Calories/Hour when you switch modes. .

HIIT Console
A brightly-lit, color-coded LCD display that is the only display of its kind that indicates the damper level and the magnetic resistance level directly on the console.

The display shows :
Air Damper Resistance Level, AirPlus Resistance Level, Time, Distance, Calories, RPM, Watts, Speed, Pulse at all times, along with Calories/Hour when you switch modes.

AIR RESISTANCE

AIR + AIRPLUS RESISTANCE

ECON Console

The easy-to-read console is designed for simplicity and the ability to view every important metric at all times in 1 simple display

The display shows :

Total Time, Work Time, Distance, Calories, Watts, Speed, RPM, Pulse, and your air resistance level. You're also able to switch modes to have your choice of viewing Calories per Hour, Watts Avg, and RPM Avg. 7 different program buttons allows you to quickly setup and start the type of exercise program you want to train for the day.

HIIT Console

A large, blue-backlit, and Smart Connect enabled LCD display with a progress circle so you can quickly identify your workout progress. Watch the progress circle move in a clockwise direction as you head towards the finish line.

The display shows :

All Important data with the addition of air resistance and airplus resistance levels. The console uses a blue-backlight to display the console brightly even under dim lights. Further, this Smart Connect compatible console allows you to connect to numerous apps in our Smart Connect Ecosystem by bluetooth and ant+.

SKI TRAINERS

AirPlus

Resistance System

Air & Magnetic Dual Resistance,
The combination of wind and magnetic resistance systems creates an extraordinary rowing experience.

Cardio + Power Training
