LVLA Leverage Lat Pulldown

The Body-Solid LVLA Leverage Lat Pulldown has a 2" x 3", 11-gauge steel mainframe, with an electrostatically applied metallic silver powder coat paint finish, sealed bearing pivot points and weight plate holders for storage. The LVLA Leverage Lat Pulldown is constructed with the commercial facility in mind featuring dual axis diverging arm movement for biomechanically correct lat pull downs and 360 degree articulating hand grips for free floating downward pulling motion and advanced biomechanics. Plus durable, double-stitched upholstery with gas assisted, adjustable seat pad.

Weight: 183 lbs.
Dimensions: 73"L x 49"W x 84"H

Special Features

- Sealed bearing pivot points
- Dual axis diverging arm movement for biomechanically correct lat pull downs
- 360 degree articulating hand grips for free floating downward pulling motion
