SBL460P4 Free Weight Leverage Gym Package

A leverage gym is a plate loaded gym that allows the user to simulate free weight movements while maximizing the amount of weight with the safety of a selectorized machine.

Each Leverage Gym exercise moves fluidly on pivot points utilizing commercial-grade pillow block bearings and oversized bronze bushings. The SBL460 Leverage Gym features an extra heavy-duty mainframe is built from 10 and 11 gauge high tensile strength steel with all-4-side welded construction. There is no other machine in its class that can compare to its strength and stability. Thick DuraFirm™ pads on the seat, back and shoulder support you comfortably through the heaviest routines. Dura-Firm™ upholstery is super tough, sweat and tear resistant and is guaranteed to never bottom out. Durable, electrostatically applied powder coat finish resists scratches, scrapes and chips. The textured finish hides fingerprints and cleans easily.

Dimensions: 107" L x 126" W x 83" H
