

# TRX1000 TREADMILL

Designed with a large 5" LCD, the console is easy-to-read so you can track important workout feedback. The intuitive layout incorporates 1 to 9 mph Direct Access speed buttons that allow you to quickly set your speed with the push of a button. The integrated bookrack and accessory holders keep your reading material, remote control, and anything else you want right where you need it. To help keep you in your training zone, hand grip pulse sensors are conveniently mounted on the padded side handlebars for easy access and a more natural feel.

The smooth and quiet 2.25HP motor of the Xterra TRX1000 delivers a heart-pounding speed range up to 10 mph, while the 3 manual incline settings allow you to push your limits. With 12 preset programs you get ultimate workout variety to keep challenging yourself and hit your personal training goals. The large 16" x 50" running surface combined with an XTRA Soft cushioned deck design enables you to take long comfortable strides while minimizing impact on knees and joints. When your workout is finished, the Xterra Fitness TRX1000 easily folds up and rolls into storage thanks to the built-in transportation wheels.
